ENEX to consider new areas of cooperation with Turkmenistan

According to the Turkmen State News Agency (TDH), President Gurbanguly Berdimuhamedov received the Belgian ENEX Process Engineering SA's Director General Kun Minne, November 7. In the course of the meeting the prospects of the bilateral partnership development in the oil and gas sector and in the new directions were discussed. "We have opportunities to develop the partnership in the chemical sector and in the sphere of processing industry", the President said.

Supporting the Turkmen president's idea on the new areas of interaction, the ENEX representative put forward a proposal to develop in Turkmenistan alternative energy sources. He familiarized Gurbanguly Berdimuhamedov with the aspects of development of resource saving technologies and the possibility of construction of semi-crystal silicon manufacturing plant in Turkmenistan. This product is used in the manufacturing of solar batteries.

According to the TDH, ENEX works in close contact with Turkmenneft State Concern since 2002. The Belgian company, operating jointly with other major European companies, has put into operation a number of facilities for the strategic sector of the country.
